

JLG Forklift Parts

JLG Forklift Parts - Following retirement in the late 1960's, John L. Grove embarked on a cross country RV trip. After spending numerous years establishing his family built crane business with his brother, John had no idea that this journey would give birth to the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling technologies was the end consequence of a road expedition.

While on their trip, John spent time talking to previous business acquaintances whom the Groves stopped to see along the way. These conversations combined with a tragic event-two workers being electrocuted on scaffolding when the Groves were traveling to the Hoover Dam- John uncovered a considerable market for a product that could swiftly and securely elevate individuals in the air to accomplish upkeep and other construction services.

Upon returning from their travels, John formed a partnership with two friends and acquired a metal fabricating company in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty workers, they manufactured and sold the first JLG aerial work platform. The business incorporates some of the basic design essentials of that original lift into existing versions.

JLG forklifts have come a long way since Mr. John L. Grove came back to town from his cross-country road trip and since the first aerial work platform debuted on the market. These days, the business proudly continues to expand itself into various marketplaces globally and develops new products to make certain clients are capable of being more effective and perform in the workplace within a safer atmosphere.
